

Vote Vault Iteration 5

By: Logan, Kevin, Julian, and Carson

Runnable, functional, modularity, testing,
development environment, clean code,
documentation

All shown during meeting with Ergin

Feedback

Mentor - Abby was impressed. We had more tests than she had during her project. Julian was unable to show what he was working on so she wasn't able to comment on that. Said we ended up with a good project.

Client - Duncan had 0 comments for us. He was happy with the project and we got a unique insight to meet VSTOP. VSTOP really liked the project. From the cyber people to the manager of VSTOP. We discussed how we would handover the project as well.

Future

Duncan said we could just give him to link with every permission, but also mentioned that he might fork it.

Teamwork

Testing - Kevin and Logan

UI overhauls - Julian and Carson
